## **BIOGRAPHY**

To Hubert, it is the process of creating his works that is what art and design is about. After all, art and design to him is an expression, a statement and a direct representation of one's self. He also believes it to be a process where we manifest our ideas that reinterpret the notions of what is art conceptually.

Hubert also studied at the Nanyang Academy of Fine Arts (NAFA) in which he has graduated from, achieving a Diploma in Fine Art with Distinction. Despite his major in painting, he strongly believes in being versatile in art and design and conceptualizing it to have its significance. He also enjoys working with different mediums that can be used to create both two and three-dimensional artworks.

Currently, Hubert is an undergraduate pursuing his Bachelor (Hons) in Fine Arts at the School of Art, Design & Media in Nanyang Technological University. By taking this step, he aims to be able to use the foundations he has learnt in NAFA and to hone his art and design practice in NTU. Through this, he looks forward to be able to not only deepen his knowledge and skillsets but also to contribute back to the local art and design scene through engaging in interdisciplinary practices that brings about interactivity through an immersive experience.
